

Housing Stock

The study concluded that overall the region's housing stock is adequate for the current and projected population's needs, both in terms of number and condition of the housing. However, the study also concluded that there is a need for revitalization of the region's housing stock through rehabilitation and/or removal of dilapidated and sub-standard units, focusing on higher-end (luxury) units, and infrastructure improvements in neighborhoods and parks. The quality of housing stock impacts not only quality of life but also economic development efforts.
